

Security organization worksheet

Part 1: Describe your security interests

- Ethical Hacking
- Vulnerability Assessment
- Cloud computing security
- Protection of sensitive data
- Raising security awareness

Part 2: Identify three organizations and include their mission or objectives

- **Organization 1: The Cyber Scheme**
 - Specializes in training for practitioners who wish to improve their practical knowledge of ethical hacking and identifying knowledge gaps.
- **Organization 1: CSA - Cloud Security Alliance**
 - Dedicated to defining and raising awareness of best practices to help ensure a secure cloud computing environment
- **Organization 3: NCSA - National Cyber Security Alliance**
 - Advocate for the safe use of all technology and educate everyone on how best to protect ourselves, our families, and our organizations from cybercrime.

Part 3: Write out which organization aligns with your interests and why

Organization 1: The Cyber Scheme aligns with my goals as an aspiring Ethical Hacker. The works to create real-world scenarios for exam candidates and supporting testers from entry to expert level with advanced mentoring and an industry-leading sponsorship programme. The organization also aims to support, educate and recruit a new generation of talent to expand the cyber industry and address the current skills gap.

Organization 2: The CSA organization also aligns with my interest in cloud security because it specifically focuses on securing cloud computing environments. Cloud computing is integral in Cybersecurity, especially when it comes to the protection of assets in the Cloud.

Organization 3: The NCSA organization seems like a good organization for general awareness and understanding which is very important in today's ecosystem. Every individual has a responsibility to be in the know regarding cybersecurity best practices and stay cyber-safe.
